About G1 Therapeutics, Inc.

G1 Therapeutics, Inc. is a privately held clinical-stage pharmaceutical company based in Research Triangle Park, NC that focuses on the discovery and development of novel, small-molecule therapies to address significant unmet needs in oncology. The company is leveraging its proprietary kinase drug discovery platform to advance a pipeline of best-in-class compounds and first-in-class drug candidates that address two markets: CDK4/6 antineoplastics and protection of the bone marrow and immune system from damage by chemotherapy (chemoprotection).
